Precipitation probability					
50%	20%	10%	30%	40%	30%

Forecast for Friday 07 Jun 2024

Weather: A cloudy start with outbreaks of showery rain. The rain will be mostly light and will tend to weaken whilst migrating east, many places remaining dry. The rain will clear east shortly after dawn, followed by sunny spells and largely dry conditions. However, these will not last and more cloud will push in from the west in the late morning. The cloud will thicken during the afternoon, leading to further outbreaks of light rain and showers in the evening.

Chance of cloud-free hill tops above 800m: 40% becoming 80% then lowering to 40% again.

Low Cloud and visibility: Poor initially, with broken cloud obscuring hills as low as 400-500m. Visibility improving after dawn as rain clears to become good, with cloud bases lifting to around 800m before filling and lowering again from the west during the afternoon, perhaps as low as 400m in the evening.

Freezing Level*	1400m	1400m	1700m	1900m	1900m	1900m	1700m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cool for the time of year, especially on summits where temperatures are exacerbated by strong winds.

Forecast for Saturday 08 Jun 2024

Weather: A band of heavy showers clears southeast at the start of the day followed by a good deal of sunny spells. Perhaps an isolated risk of a shower in the morning but becoming mostly dry by the afternoon. Feeling cold on summits but with high UV levels sun protection is advised.

Maximum wind: West-northwesterly winds 15-25mph gusts 25-35mph.

Chance of cloud-free hill tops above 800m: 30% in the morning becoming greater than 95%.

Low Cloud and visibility: Scattered to broken amounts of cloud 400-500m as a band of showers passes in the morning with visibilities falling to moderate or poor. Once cleared, cloud bases quickly lift and break with bases well above summits. Visibility improving to very good.

Temperature: **Valleys:** Plus 9 Celsius becoming Plus 13 Celsius.
At 800m: Plus 3 Celsius becoming Plus 6.
Freezing level: Just above highest summits.
